

What is claimed is:

1. A closure having a peripheral skirt and a ceiling extending inwardly from atop of the skirt wherein the peripheral skirt has an outer surface that is a gripping area for removing the closure from a container and wherein the outer surface has a covering that is part of the closure.
2. A closure according to claim 1, wherein the covering is comprised of a material having a different composition than the closure.
3. A closure according to claim 1, wherein at least part of the covering is a soft feel material.
4. A closure according to claim 3, wherein the covering covers at least 20% of the outer surface of the peripheral skirt.
5. A closure according to claim 3, wherein the covering covers at least 30% of the outer surface of the peripheral skirt.
6. A closure according to claim 3, wherein the covering covers at least 50% of the outer surface of the peripheral skirt.
7. A closure according to claim 3, wherein the covering covers at least 65% of the outer surface of the peripheral skirt.
8. A closure according to claim 3, wherein the covering covers at least 80% of the outer surface of the peripheral skirt.
9. A closure according to claim 3, wherein the covering covers 100% of the outer surface of the peripheral skirt.

10. A closure according to claim 3, wherein the soft feel material is selected from the group consisting of cataloy polyolefin, thermoplastic olefin, thermoplastic elastomer, lacquer, and soft feel paint.
11. A closure according to claim 1, wherein the covering is comprised of at least two labels.
12. A closure according to claim 3 wherein the covering is comprised of at least two labels.
13. A closure according to claim 1, wherein the covering has a thickness of 2-12 mils.
14. A closure according to claim 1, wherein the covering has a thickness of 2-8 mils.
15. A closure according to claim 1, wherein the closure is made of a material selected from the group consisting of polypropylene, polyethylene, polycarbonate, polyamides and/or polyethylene terephthalate, polyvinylchloride, and polystyrene, including multilayer combinations thereof.
